

Amendments to the Drawings:

The attached sheets of drawings include changes to Fig. 8. These sheets, which include Fig. 8, replace the Replacement sheets submitted December 3, 2003, including Fig. 8.

Attached: Replacement Sheets

Appendix A: Annotated Sheets Showing Changes

REMARKS

The amendments to the Specification insert required assigned sequence identifiers in their proper locations.

The amended Figure 2 corrects inadvertent errors of a typographical nature made without deceptive intent. These include corrections to 1) a line of incorrect font to realign nucleotide codons with their encoded amino acid residues; 2) word-processing errors which created "wrap-around" lines in amino acid residues; 3) spacing errors resulting in misalignment of codons with their encoded amino acid residues; 4) a lower case instead of upper case amino acid one-letter symbol; and 5) an omission of an alternative amino acid encoded by a degenerate codon.

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-50, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,

Jean M. Lockyer, Ph.D.
